How To Get Live Captions On Google Chrome

Google Chrome has a feature users can turn on that will provide captioning for all media, including the eShow platform being used for TEC. Follow the steps below to turn these captions on. Please note that these closed captions will only work in Google Chrome.

1. In your Google Chrome URL bar, search chrome://flags
2. Search “Live Captions” and enable the flag “#enable-accessibility-live-captions”
3. Restart Chrome
4. Use the Chrome menu to go to open Settings
5. Select “Advanced” (see diagram below)
6. Select “Accessibility” (see diagram below)
7. Enable “Get captions for your media” (see diagram below)
8. Live captions will now appear in a text window at the bottom of your Chrome window when any media is played. This window can be customized, moved, or closed as desired.
